FARMER'S DREAM

project

POWER INDEPENDENT AGRICULTURAL FARM USING RENEWABLES

List of Used technologies

- 1 Wind Turbine**
Boiling Water, Greenhouse Heating, Direct Consumption, Charging LENR Cells, 5-10 kWp
- 2 PV Folio placed on blades of wind turbine**
Charging LENR cells, 700 Wp
- 3 Water Turbines in Eaves**
Charging LENR Cells, Rain Water Streamed to Water Treatment, 300 Wp
- 4 PV Panels fitted on the roofs**
LENR Cells charging, direct consumption, 5-10 kWp
- 5 Water Turbine in Sewerage Pipelines**
charging LENR Cells, 10 kWp – 300 kWp
- 6 Waste Water Treatment**
Water Recycling at the Farm, drinking and service water
- 7 Water Treatment**
Service water for house, garden and greenhouses, drinking water for house
- 8 LENR Cells – Battery Storage**
Charging of external and portable devices
- 9 Back-up generator**
15 - 20 kW
- 10 Central Electronic Management System**
- 11 LENR Cells**

Power Trailer

- A Wind Turbine**
- B PV folios and panels**
- C Back-up petrol or diesel generator**
- D LENR Cells**
