POWER RATS

project

GENERATING POWER OF WASTE AND RAIN WATERS BY SIMETI TURBINES

List of Technologies

- 1 Water Turbines in Sewerage Pipelines**
10 - 30 kWp
- 2 Water Turbines in Sewerage Pipelines**
Charging LENR Cells, 10 - 30 kWp
- 3 Electric LENR Cells (Batteries)**
Power Storage, Charging external and portable devices
- 4 Battery Storage**
10 - 50 kWh
- 5 Central Electronic Management System**
- 6 Consumption of generated power on spot**
Lighting streets, schools, public buildings, heating buildings, back-up power solution for security systems in buildings
- 7 The whole system is modular**
Apply in large scale of usage

--- electricity
— rain water
— heating
